

Bogie Weighing Systems

Highly accurate Bogie Weighing Systems, designed for rail workshops.

Weighwell Engineering Ltd provide highly accurate and easy to install bogie weighing systems that can be integrated into any type of new or existing bogie test machines. This is ideal for recently built, repaired or refurbished bogies.

Our innovatively designed train weighing loadcell's (TrackCells), take the hard work out of building accurate, cost effective wheel and axle weigh stations for different types of locomotives and rolling stock.

Our TrackCell's provide individual wheel weights and can reports on axles, bogies and wagons. Each system is supplied in multiples of four, therefore allowing the weighing of up to 8 axles simultaneously.

Key benefits of the Bogie Weighing Systems

- Easy to install.
- User friendly.
- Wheel by wheel weighing.
- Factory pre-calibration.
- Enhances Bogie quality control.
- Minimal foundations needed.
- Can be supplied as a self Installation package.

The Bogie Weighing Systems use our ptwX software which provides accurate weighing data for rail workshops and can be integrated into any type of new or existing bogie test machines.
